## ASSEMBLY STEPS

**I.** Set the Metal Base on the floor and then secure the Lower Pole into the base using 3 Large Screws. Slide the Ball-Bearing down the Lower Pole.

**II.** Secure the Upper Pole to the Lower Pole by twisting with your feet stepping on the base. Twist the pole very tight to ensure it has been fully secured.

**III.** Slide the Bottom Attachment Square down the Lower Pole. Make sure the flat side is up.

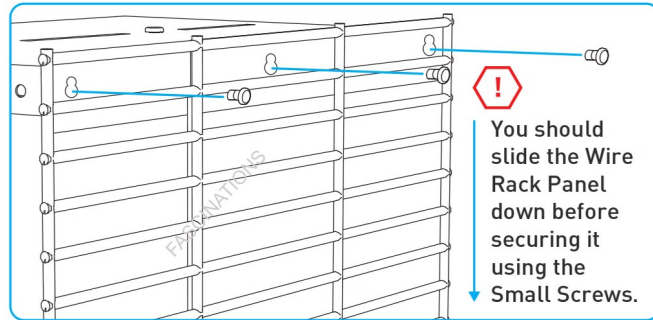

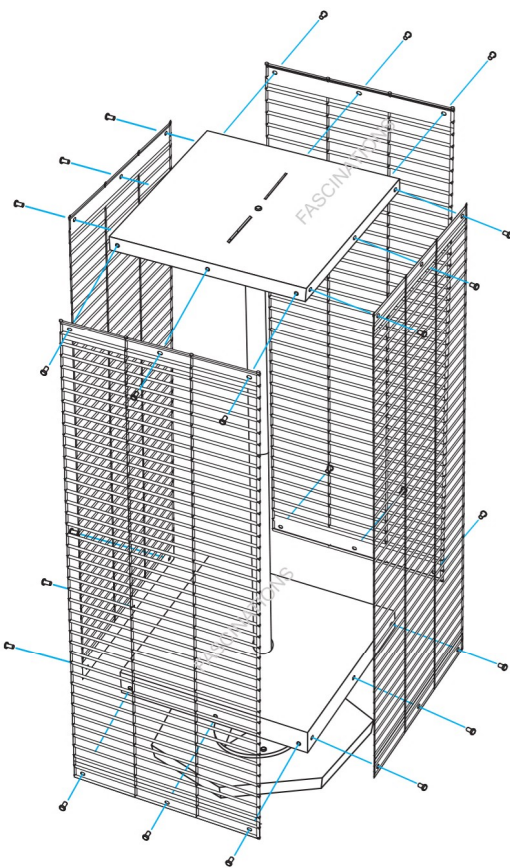

**IV.** Slide the Top Attachment Square down over the top of the Upper Pole. Make sure the flat side is up.

**V.** Secure the Upper Pole to the Top Attachment Square using the Large Screw.

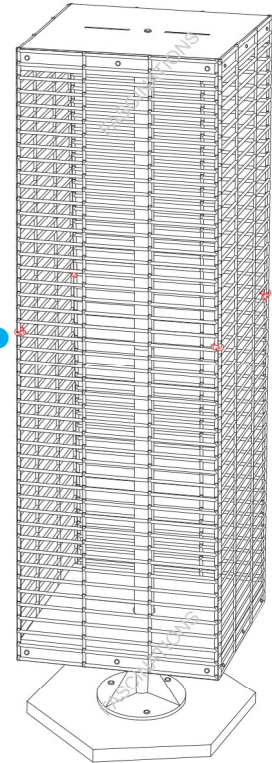

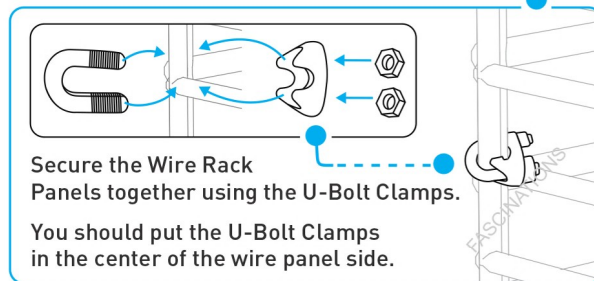

# ATTACHING THE WIRE RACK PANELS

(NOTE: It is helpful to have an additional person hold each panel in place, while the screws are inserted and tightened).

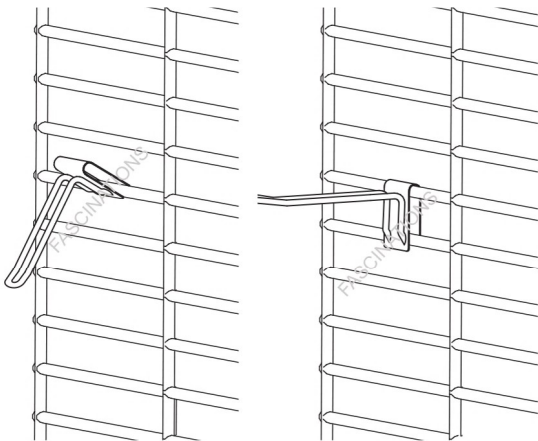

- VI.** Secure the Wire Rack Panel to the Top Attachment Square using 3 Small Screws with the flat side of the panel facing in. Then secure the Wire Rack Panel to the Bottom Attachment Square using 3 Small Screws. Repeat until all 4 panels are attached.

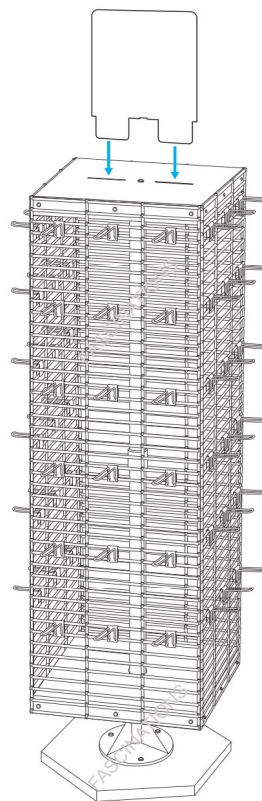

Drive the screws halfway into the Top and Bottom Attachment Squares first, then hang the panel and tighten the screws.

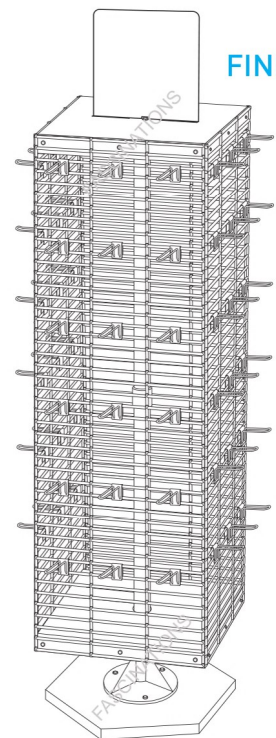

- VII.** To insert the Metal Hook, slide the hook downward until it covers the second wire as illustrated below.

It is helpful to hang a product sample on the first hook before setting up the others. This will allow you to better determine how to space out the other hooks and to best display the products. There should be space between the hooks so that customers can freely browse and easily remove the product from the hook.

- VIII.** Slide the Header Card into the Top Attachment Square .

**FINISHED!**

Display diameter: **18.7"** (47.5cm)  
Height with Header Card: **69.7"** (177cm)

If you have any problems assembling this display or there are missing parts, please give us a call: **206-870-3000** (8:00-4:00 PST).
